

2016 Scorecard

Information from 1 January – 31 December, 2016

Our scorecards give information about our client groups and their rehabilitation outcomes.

Community Rehabilitation in Wellington

ABI Rehabilitation offers comprehensive home, community, and clinic-based rehabilitation for adults and children.

Concussion service: Multi-disciplinary treatment for clients with mild to moderate traumatic brain injury.

Training for Independence (TI): Rehabilitation to increase independence in self care, domestic, and community-based activity.

Psychological services: Support for individuals to manage changes to their mood, cognition or behaviour following their injury.

Assessments: A series of tests (medical, physical, and/or pen-and-paper) designed to identify strengths and weaknesses.

Satisfaction outcomes

Out of 35 client responses

“Overall, how satisfied were you with our services?”

100%
Were ‘mostly satisfied’, ‘satisfied’, or ‘completely satisfied’

“Would you recommend our services?”

100%
Said ‘Yes’

“Rate the change in your condition?”

96.9%
Got ‘moderately better’, ‘better’, or ‘a great deal better’
