

Attention and communication following a traumatic brain injury

Do you know someone who has had a traumatic brain injury and experiences problems with concentration and paying attention?

Are you the spouse, partner, caregiver or whānau member of this person?

This study is seeking the perspectives of whānau who live with someone that has had a traumatic brain injury and experiences problems with concentration and paying attention.

There will be a **45-60 minute interview** about your experience. We will give you a \$30 voucher to thank you for your time.

If you are interested, please contact one of the researchers below.
